

PescaVision 30

Fish counter with open cover
(View on the polyester separation)

*On trout

**reception tank in option

Pescavision 30 coupled on Helios 50 Fish Grader

Fish farmers have been using our **Pescavision 30 and 50** which combines the latest L.E.D technology and unparalleled ease of use. They can be installed very rapidly.

The Pescavision models covers counting needs extending from 10 g to 4,5kg*.

Pescavision is designed to be placed at the outlet of the sorting system, thereby centralising the equipment and reducing the installation time.

Fish counter working in Trout farm.

Helios 50 and 3 counters with reception tank.
